PROFILE

Technically inclined, driven, and solution-oriented, with experience in leadership.
I am passionate about technical challenges and have always sought new ways to tackle problems. Logically demanding tasks have always been interesting and engaging for me to take on. Programming combines my interest in logical challenges with the opportunity to create tangible solutions. Through my JA company (Junior Achievement), I have also gained valuable experience in business development and marketing. I am now seeking opportunities to apply my technical skills and drive in programming to contribute to an innovative and successful organization.

In my free time, I enjoy cooking and fishing—activities that require both creativity and patience. During the winter months, I also enjoy snowboarding.

WORK EXPERIENCE

Teamleader

Part time job, Hönö Fisk AB - Onsala and Mölndal

August 2018 - current workplace

In 2018, I started as a shop assistant on Hönö Fisk AB (Hönö Fish AB) and in 2020 I got promoted to team leader. I've worked full-time during the summers and part-time on weekends and holidays during the rest of the year. As a team leader, I have a lot of different tasks, including production, sales, cleaning and purchases (as a supply manager). Furthermore, I've shared responsibility for training new colleagues and have since 2020 taken full responsibility of the store (including management and purchases) when the store manager is on summer vacation.

During my time on Hönö Fisk AB, I've developed and improved a lot of skills. For instance, I've improved how to take responsibility and how to make decisions in different situations. The job have also given me considerable experience of customer service. Furthermore, the teamwork at Hönö Fisk has improved my group collaboration skills when it comes to effective communication, helping colleagues and improving the work environment.

JA - COMPANY

Clean Case UF

August 2020 - June 2021

During my 2nd year in high school, I started the JA-company Clean Case UF (Clean Case JA), with a fellow student in our course Entrepreneurship. Our business model was to sell water bottles made of renewable materials. We marketed our bottles on Facebook, where customers could order the bottles through our website. The vast majority of the sales were made up of door-to-door sales and sales from our showcase on Hönö Fisk AB.

See my certificate of succeeded JA-year below.

EDUCATION

Chalmers - BSc and MSc in Computer Science

August 2022 - June 2027

I am currently in my third year of a Bachelor's degree in Computer Science at Chalmers University of Technology, with plans to begin a Master's degree in Computer Science this fall. Throughout my studies, I have developed strong programming and problem-solving skills, as well as a broad understanding of algorithms, computer systems, and software development. This spring, I am working on my bachelor's thesis, an industry project supervised by Johan Fischer, founder of MyGuard.online, focusing on analyzing and visualizing log and telemetric data.

See my grades below.
